SUMMARY

B.Tech Computer Science (Cybersecurity) student building secure backend systems, REST APIs, and AI-powered applications with Python and Java. Experienced with FastAPI, Flask, Docker, and AWS, with a security-first approach to software engineering carried over from hands-on penetration testing work. Currently deepening machine learning fundamentals and building with AI-assisted development tooling (Claude Code) as part of a modern, faster engineering workflow.

TECHNICAL SKILLS

Languages:

Python, Java, JavaScript, SQL, C

Backend:

FastAPI, Flask, REST APIs, Node.js

Databases:

MySQL, PostgreSQL

Cloud & DevOps:

AWS, Docker, Git, GitHub

Core CS:

OOP, Data Structures, DBMS, Operating Systems, Computer Networks

Developer Tools:

VS Code, Postman, Linux, Claude Code (AI-assisted development)

Currently Learning:

Machine Learning / Applied AI fundamentals

PROJECTS

VaultIQ — AI-Powered Secure Knowledge Platform

- Built a document platform in Python with a secure backend architecture and client-side encryption (AES-256) so files are encrypted before upload.
- Built REST APIs with FastAPI; containerized services with Docker.
- Integrated AI-based document classification, including a trained machine-learning ensemble that flags AI-generated submissions.
- [**github.com/SecurityWithHem**](https://github.com/SecurityWithHem)

Dharma — Compliance Automation / Self-Hosted GRC Platform

- Built backend modules for governance and compliance automation, including a self-hosted engine that maps evidence to controls using a local AI model.

- Designed reusable REST APIs and cryptographic (hash-chained) audit logging so compliance evidence can't be silently altered.
- Built with Python and Docker for scalable, self-hosted deployment.
- [**github.com/SecurityWithHem**](https://github.com/SecurityWithHem)

Enterprise API Testing Framework

- Automated API validation workflows using Postman and Python.
 - Tested authentication and authorization flows against OWASP API best practices; documented findings and recommended improvements.
-

EXPERIENCE

HackersVilla Cybersecurity Pvt. Ltd. — Cybersecurity Intern

Mar – May 2024

- Collaborated with engineers on software security assessments and API testing.
 - Assisted with vulnerability analysis, technical documentation, and remediation reporting.
 - Worked with Linux, scripting, and secure software development practices.
-

EDUCATION

Navrachana University — B.Tech, Computer Science (Cybersecurity)
2023–2027

CGPA: 7.81 (through Semester 6)

CERTIFICATIONS

- AWS Academy — Machine Learning Foundations (2026)
 - AWS Academy — Data Engineering (2026)
 - Google Cybersecurity Professional Certificate — Coursera (2024)
 - TryHackMe — Offensive Pentesting, Web Application Pentesting, Jr Penetration Tester, Web Fundamentals, Cyber Security 101, Pre Security
 - ISEA Digital Certificate — CDAC / MeitY (2024)
-

ACHIEVEMENTS

- Top 2% globally on TryHackMe; 175+ hands-on labs completed.
- Built and shipped 3 independent security-focused software projects (VaultIQ, Dharma, Enterprise API Testing Framework).
- 10 industry certifications across cloud, AI, and cybersecurity.
